Greening in and around NPPF complex within Thimphu

Sir,

The Ministry of Agriculture and Forests have received directives to make Thimphu city area green with plantation together with Thimphu Thromde. The Chief Forestry Officer of Social Forestry and Extension Division, DoFPS and Zimpon Wom Dasho Karma Tenzin conducted the reconnaissance survey of Thimphu Thromde to comprehend the greening areas. One of the areas that have the potential to contribute to the greening of Thimphu city is the NPPF area.

The plantation trees should be root balling or seedlings not less than 10 feet in height of ornamental and aesthetic values. The Department of Forests and Park Services, MoAF will provide you the technical advice and assist you to identify the site and selection of species to be planted in the area, but the NPPF should plan and start immediately.

Please contact Karma Jigme Tempel, Chief Forestry Officer, SFED for further assistance and clarifications.

Anticipating your cooperation.

Yours sincerely,

(Thinley Namgyel)
